

Lift

Height-adjustable work surface and storage cart for home cooks

Lift is designed to give more freedom to older individuals and people with disabilities in the kitchen.

For users in wheelchairs, Lift provides a moveable work surface with integrated storage, giving them more comfort and flexibility while cooking.

Lift features adjustable height and smooth mobility. This allows users to transport objects in the kitchen with ease, from the fridge, to the counter or over the sink, and in and out of the oven.

The height-adjustability allows Lift to be used as a counter at a suitable height for users of any level of ability

Accommodates wheelchairs, can fit around oven doors, and leave space for users when it is against counters

The platform can be raised and lowered to assist with lifting heavy or hazardous objects

Integrated storage gives individuals with limited mobility more flexibility to be more creative in the kitchen
